Camera Installation

① Wipe the front windshield clean. Stick the electrostatic sticker on the glass and ensure that it is free of bubbles.

③ Tear off the 3M adhesive on the bracket, paste the dash camera on the electrostatic sticker, and lay cable as shown in the figure.

⑤ Adjust the lens to the appropriate monitoring scene. The maximum adjustment angle of the lens is 165°. The installation is completed.

② Insert one end of the power cable into the power supply interface of the dash camera.

④ Insert the car charger into the cigarette lighter and connect the power cable of the camera.

Operating with App

① Scan the following QR code to download and install the App.

iOS

Android

② Run the App, select and connect Wi-Fi of the camera.

③ After successful connection to the camera, you can set parameters and real-time preview video.

Functions

Start and shutdown

Connect the dash camera to the vehicle power supply through cigarette lighter. When the vehicle engine starts, the dash camera will start and record. After the engine shuts down, the dash camera shuts down.

Video Recording

The camera supports normal recording and emergency recording. When recording, you can set whether to collect sound or not in App.

Voice Control

The dash camera supports voice control. After the device is turned on, directly say the command to trigger the corresponding function. This function only support English, Japanese and Russian.

Command	Function
Open recording/Turn on recording	Enable audio recording and video contains sound.
Close recording/Turn off recording	Disable audio recording and video do not contain sound.
Take picture	The dash camera will take a picture.

FAQ

If some functions do not work properly or the relevant setting values are changed, try restarting the camera or restoring the factory settings.

Q: The dash camera is frequently powered off?

- A:
- Confirm whether the power cable of the dash camera is connected normally and whether each port is loose.
 - Ensure that the power cable of the dash camera is normal and free from damage.

Q: The dash camera can not be started?

- A:
- Confirm whether the engine is started and whether the power supply is normal.
 - Confirm whether the cigarette lighter is loose.

Q: The dash camera is easy to fall off?

- A:
- Clean the windshield before installation.
 - Check whether 3M adhesive and electrostatic sticker are firmly attached.

Q: The video is blurred?

- A:
- Check whether the lens protective film is removed.
 - Check whether the windshield or camera lens is dirty.

Q: The dash camera cannot record normally?

- A:
- Confirm that the dash camera is started.
 - Confirm whether the TF card is inserted.
 - Confirm whether the TF card is normal: whether the TF card is formatted and whether the service life of the TF card is too long. Replace the TF card.

Q: The mobile phone cannot be connected to the dash camera?

- A:
- Confirm that the correct App has been installed on the mobile phone.
 - Restart the dash camera and App.

Q: The mobile phone cannot play the video?

- A:
- The situation may be related to the player or system of the mobile phone. Please put the TF card into the computer to read and play.

Technical Specification

Parameter	Description
Frame Rate	Single record: 5K Dual record(Upgrade module): 4K+1K
Iris	F1.75
Field of View	143°
Storage	1 TF card port, supports 32 GB-128 GB.
G-sensor	Built in, supports locking video after collision.
ADAS	Support
Wi-Fi	Support
Audio Recording	Support
Power Supply	DC 5V/2A
Rated Power	<3.5W
Operating Temperature	-20°C to 70°C(-4°F to 158°F)
Operating Humidity	95%(MAX)
Size	106.0mm×49.5mm×39.8mm (4.17"×1.95"×1.57")
Weight	≈120g
